## TECHNICAL TOOLBOX

### LANGUAGES:

JavaScript, C#, TypeScript, HTML5, CSS3

### LIBRARIES:

NGRX, NGRX/Store, RXJS

### FRAMEWORKS:

Angular, ASP.NET Core, Express.js, Django, Flask

### DATABASE:

MySQL, SQLite, PostgreSQL, NoSQL (MongoDB, Mongoose)

### TECHNOLOGIES:

Kendo, Angular  
Material, Node.js, Socket.io, Bootstrap4, Git, Github,  
Visual Code, JIRA, Trello, AWS EC2, Azure

**METHODOLOGY:** OOP, MVC, RESTful Architecture,  
Business/System Analysis, Quality Assurance

## EDUCATION

Coding Dojo  
Bellevue, WA

### Bachelors Degree in Computer Science

University of Perpetual Help System -DALTA  
Manila, Philippines

## PROFESSIONAL EXPERIENCE

Software Engineer | HCL America Inc., Redmond WA

### Client: Microsoft

- **Aug 2018 - Present**
- **Key Responsibilities:** support legacy systems responsible for generating failures/alerts of windows device and mobile build/development which are used for reporting and triaging across different teams in Microsoft.
- Perform root cause analysis of identified/raised bugs by clients and provide scalable and permanent code resolution in C#.
- Developed front-end and back-end (DB methods, API) features for small and large scale requirements using C#.
- Developed **one-page application** using Angular to monitor ICM Incidents of build failures.
- Developed outlook plug-ins, tree view component using Kendo UI.
- Developed **TAP action manager** - a monitoring web application that provide actionable insights based on the generated data from different sources for the triage microsoft teams. Utilized lazy loading, ngrx/store, api calls, web services, dynamic content projection.
- Active participation in scrum meeting.
- **Technology:** Angular 8, Angular-Material, Bootstrap 4

### Full Stack Web Developer | Coding Dojo - Bellevue, WA

- **Feb 2018- May 2018**
- **Key Responsibilities:** Completed an intensive full-time web development program for more than 1000+ hours.
- Completed small to large scale wireframe replica of widely used applications such as E-commerce, Facebook, Expedia, Meetup and the like. Analyze the wireframe and strategy for build. Achieved the highest scores in 3 languages (MEAN, C# and Python) Stack exams in developing full CRUD application.
- Collaborated with other peers for weekly project development.

## PROJECTS

### HitchHikers | C#

<https://github.com/4hitchhikers/HitchHikers>

- **Key Responsibilities:** Developed,Test code for photo's upload, applied Session for persistent of user's credentials across all pages, developed (HttpGet) and (HttpPost) of data using LINQ, developed and test page routing of the applications are working, front-end styling, researched and test SignalR configuration for the chat functionality. Reseach and testing for Map.
- **Tools:** JVectorMap, JQuery, SignalR, ASP.Net Core, SQLite, C# Core

### Wanderlust | MEAN

<https://github.com/thydev/acommerce>

- **Key Responsibilities:** dynamic products' filtering for efficient user experience, developed and test product page components and logic for shopping carts, used web service to communicate to back-end server.
- Ongoing team project for an E-commerce travel products which utilize single page application.
- **Tools:** MEAN (Mongo, Express, Angular, Node.js), APIs

### Restaurant Reviews | C#

<https://github.com/RoseReyes/RestaurantAndRatings>

- **Key Responsibility:** Database creation and connection using MySQL, used Entity to create models objects, utilize MVC design pattern, created Login and Registration with specific ViewModel for validation, created business logic for adding reviews, ratings and displaying of historical page per user.
- **Tools:** C#, ASP.NET Core, Entity, MySQL, Bootstrap4

## PROFESSIONAL EXPERIENCE

### Business Analyst | GCI, Anchorage, AK

Feb 2018- May 2018

- **Key Responsibilities:** Developed Dashboards in JIRA to monitor SIT and End to End Testing tickets which resulted in quick escalation and resolution of tasks assigned to each team members.
- Created Diagrams and Process Flow for the Service Provisioning current and previous state process .
- Implemented logic for the data migration business transformation rules that were determined only during the testing activity. As a result, Testing turn-around time and completion progressed from 50% to 90%.

### Business Analyst | Manila, PH

May 2013- May 2015

**Key Responsibilities:** Developed scheduled job processes to capture data in legacy system to identify fault tickets. It allowed Supervisors, Logistic Coordinators and Zone Head Supervisors identify bottlenecks and prevented unnecessary escalation and SLA penalty of their contractors.

### Systems Analyst | 24/7 Intl, Prime Outsource Manila, PH

2011 - 2012

### Web Developer | ACTIV8 SOLUTIONS , Manila, PH

2019 - 2010

**Key Responsibilities:** Developed efficient and dynamic codes for money remittance website module such as registration, remittance, computation, and content manager (administrator page) using ASP, JavaScript, and CSS for website's GUI. Designed Database Schema using MS SQL 2005 and developed stored procedures for database transaction's modules.
